

Please we as Flight Attendants have enough problems with Pax listening and follow FAA regulations - They want to argue with you about that - CELL Phones !!! OH MY!!!

Ok I make the PA to allow cell phone usage at taxi in/landing - I have had serveral Pax talk on their cells to the point of yelling - This is not acceptable and Pax cant listen and talk at the same time. this is a safety issue for them and those around them - Please as a Flight Ateendant dont allow this risk to happen!!!
